Serbian

Našu proizvodnju karakteriše savremen pristup poslu, fleksibilnost u izradi u pogledu materijala, oblika, površinske zaštite, zatim visoka stručnost u poslu, počevši od dizajniranja i projektovanja, izrade, završne obrade i isporuke. Kvalitetan izbor osoblja, radna etika i stručno vođenje nam obezbeđuju visok kvalitet izrade. Pored klasičnog pristupa dizajnu i izradi elemenata i konstrukcija od kovanog gvožđa, koristeći savremene metodologije projektovanja i savremene tehnologije obrade metala u stanju smo da damo novu dimenziju i duh metalnim i kovanim konstrukcijama.

English

Our production is characterized by a modern approach to work, flexibility in the choice of material, shape, surface protection, and high expertise in business, ranging from design and planning, manufacture, finishing and delivery. A good selection of personnel, work ethics and professional conduct provide high quality of our products. In addition to the classical approach to the design and production of wrought iron elements and construction, using contemporary design and modern metal processing technology, we are able to give a new dimension and the spirit of metal and wrought iron structures.

Italian

La caratteristica principale della nostra produzione è un moderno approccio al lavoro, flessibilità di lavorazione per quanto riguarda materiali, forme e protezione di superficie ma anche la professionalità molto elevata nel settore per quanto riguarda design, progettazione, lavorazione, finitura e consegna del prodotto finale. La selezione del personale ed etica di lavoro professionali ci permettono ottima qualità di produzione. Oltre al classico approccio al design e alla progettazione di elementi e strutture in ferro battuto, utilizzando metodologie di progettazione e tecnologie di lavorazione di metallo moderni siamo in grado di dare una nuova dimensione e lo spirito alle strutture in metallo e in ferro battuto.
